ADDITIONAL INFORMATION

PERSONAL HISTORY

A freelance designer currently working on both spatial and graphic-based projects.

Now at senior level, I've worked in various disciplines, including traditional print, interior architecture and graphic design. This experience, together with a sound knowledge of design history and a healthy interest in culture of all kinds, allows me to approach the design process from a different perspective to most.

I have a love of nature and the outdoors generally, and in particular the ability of well designed public spaces, landscapes and structures to enhance not only the immediate environment, but also the emotions of the observer and user.

INTERESTS

Music, food, literature, landscapes, clean air & classic cars.
